## Part I Capture Workflow 1

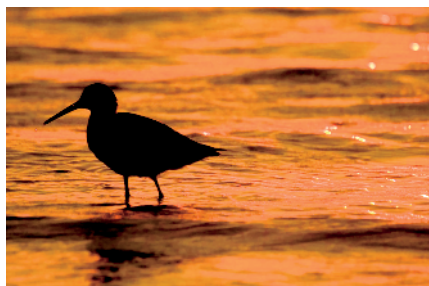

### chapter 1 What are Raw Files Really About? 3

A RAW Start . . . . .	4
Why use RAW? . . . . .	5
Understanding RAW . . . . .	6
RAW Capabilities. . . . .	7
Do not Shortchange RAW . . . . .	8
What is 16-Bit all About? . . . . .	10
Proprietary Formats . . . . .	12
The Value of DNG . . . . .	12
Does JPEG have a Place? . . . . .	13
Q&A . . . . .	16

## chapter 2 Shoot RAW Right from the Start 17

<b>The Digital Darkroom . . . . .</b>	<b>19</b>
<b>Understanding the Sensor . . . . .</b>	<b>19</b>
<b>Dealing with Limitations . . . . .</b>	<b>21</b>
<b>Exposure – More than Getting Brightness Correct. . . . .</b>	<b>21</b>
<b>Reading the Histogram without Being an Engineer . . . . .</b>	<b>24</b>
<b>Interpreting the Histogram . . . . .</b>	<b>26</b>
<b>Looking at Histograms: Examples of Good and Bad Exposures . . . . .</b>	<b>27</b>
Perfect exposure with ideal histogram . . . . .	27
Nice range of tones from left to right . . . . .	28
Histogram has visual relationship to scene . . . . .	28
Light tones kept in range . . . . .	29
Black-and-white challenge . . . . .	30
Restricted tonal range still needs good exposure . . . . .	30
Poor exposure causes color problems . . . . .	31
Bad light causes exposure problems. . . . .	31
Poor exposure causes background problems . . . . .	32
Exposure for shadows washes out highlights . . . . .	33
<b>Filters are Still Necessary . . . . .</b>	<b>33</b>
<b>Noise Raises its Ugly Head . . . . .</b>	<b>35</b>
<b>Variations among Cameras . . . . .</b>	<b>39</b>
<b>Q&amp;A . . . . .</b>	<b>41</b>

chapter **3 Color and RAW** 43

<b>Good RAW is Good Color</b> . . . . .	<b>45</b>
<b>Adobe RGB versus sRGB</b> . . . . .	<b>46</b>
<b>Color Space for the Purpose Needed</b> . . . . .	<b>47</b>
<b>White Balance: A RAW Workflow Issue</b> . . . . .	<b>48</b>
White balance in the camera . . . . .	49
Auto white balance . . . . .	50
Preset white balance . . . . .	51
Custom white balance . . . . .	52
<b>Q&amp;A</b> . . . . .	<b>54</b>

chapter **4 What's New in Adobe Camera Raw?** 55

<b>Making RAW Processing More Photographic.</b> . . . . .	<b>56</b>
<b>Some Changes to the Interface</b> . . . . .	<b>58</b>
First tab changes – tonal adjustments . . . . .	60
First tab changes – color adjustments . . . . .	61
Tone Curve changes . . . . .	62
Changes to the Detail tab . . . . .	62
The new HSL and Grayscale tab . . . . .	63
The new Split Toning tab . . . . .	64
Presets . . . . .	64
<b>How Lightroom Affects Camera Raw</b> . . . . .	<b>66</b>
<b>Q&amp;A</b> . . . . .	<b>68</b>

## Part II Camera Raw Workflow 69

### chapter 5 A Quick Look at Camera Raw Tools and Workflow 71

Finding Your RAW Photos . . . . .	73
Bridge Capabilities . . . . .	74
Opening Camera Raw . . . . .	81
The Importance of Reset and Undo . . . . .	83
Camera Raw in Six-Part Harmony . . . . .	85
Camera Raw Toolbar . . . . .	86
Preview Options . . . . .	90
The Ideal Workflow . . . . .	92
Base Settings . . . . .	96
How to Approach Camera Raw . . . . .	98
Monitor Calibration . . . . .	99
Q&A. . . . .	101

### chapter 6 Workflow Applied 103

What is Your Photo About? . . . . .	105
Auto Settings . . . . .	105
Workflow Options . . . . .	106
Tonal Adjustments . . . . .	110

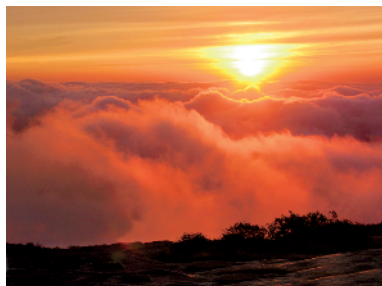

Color Adjustments . . . . .	121
Detail Adjustments – Sharpening . . . . .	125
Detail Adjustments – Noise Reduction. . . . .	130
Save Your Work . . . . .	131
Setting Up Camera Raw for Your Camera . . . . .	133
Q&A. . . . .	136

chapter **7 Advanced Tonal Control**    **137**

Evaluate the Image . . . . .	138
First Adjustments – Blacks and Highlights . . . . .	140
Tone Curve Adjustments . . . . .	142
Back to Basic and Clarity . . . . .	145
Back to Color . . . . .	146
Refining Color . . . . .	149
Sharpening with the Detail Tab . . . . .	151
Evaluate, and then Open or Save. . . . .	155
Q&A. . . . .	156

chapter **8 White Balance Decisions**    **157**

<b>A Neutral Subject is Rarely Neutral . . . . .</b>	<b>160</b>
Wave tonalities interpreted and more. . . . .	161
Cloud, water, and rocks color . . . . .	164

<b>Dusk Light</b> . . . . .	<b>165</b>
Dusk interpreted . . . . .	165
Dusk color revealed . . . . .	170
<b>Aquarium Greenery</b> . . . . .	<b>173</b>
<b>Evaluating Color</b> . . . . .	<b>180</b>
Key colors . . . . .	180
Critical colors . . . . .	181
Memory colors . . . . .	181
Colorcasts . . . . .	181
Weak color . . . . .	182
Color interactions . . . . .	182
Creative colors . . . . .	183
<b>Q&amp;A</b> . . . . .	<b>184</b>

## chapter **9 The Noise Problems No One Talks About** 185

<b>When Noise Becomes a Problem</b> . . . . .	<b>187</b>
<b>Watching for Noise</b> . . . . .	<b>188</b>
<b>Reducing Noise in Camera Raw</b> . . . . .	<b>189</b>
<b>Working to Control the Noise</b> . . . . .	<b>191</b>
Looking deeper at noise . . . . .	195
<b>Readjusting the Image</b> . . . . .	<b>197</b>
<b>Q &amp; A</b> . . . . .	<b>198</b>

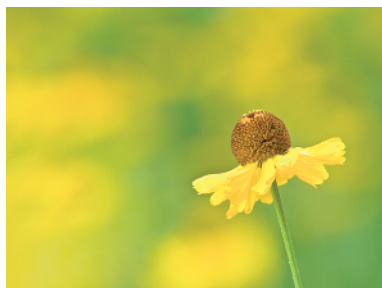

## chapter **10 Special Features of Camera Raw** 199

<b>Special Tabs of Camera Raw . . . . .</b>	<b>200</b>
<b>Fixing Lens Problems . . . . .</b>	<b>202</b>
Correcting aberrations . . . . .	203
Vignetting adjustments . . . . .	205
<b>Using the Retouch Tool . . . . .</b>	<b>207</b>
<b>Using the Red Eye Removal Tool . . . . .</b>	<b>209</b>
<b>Influencing Color Changes . . . . .</b>	<b>209</b>
<b>Batch Processing . . . . .</b>	<b>211</b>
Simple batching renaming . . . . .	212
Group processing . . . . .	215
<b>Duplicating Processing: Saving Settings and Presets . . . . .</b>	<b>219</b>
<b>Q &amp; A . . . . .</b>	<b>222</b>

## **Part III Making Camera Raw Work Harder for You 223**

### **chapter 11 Tough Decisions 225**

<b>Soft Colors . . . . .</b>	<b>226</b>
No harsh contrasts . . . . .	227
Adjusting with soft in mind . . . . .	229
Color enhancement . . . . .	232
The Detail tab . . . . .	232
<b>Backlit Contrast . . . . .</b>	<b>235</b>
Core decisions . . . . .	236
<b>Color enhancement . . . . .</b>	<b>240</b>
<b>Not the Normal Light . . . . .</b>	<b>243</b>
Color or tonalities first? . . . . .	243
Night tone interpretation . . . . .	246
Adjusting for the night . . . . .	247
Crop for evaluation . . . . .	248
Night noise . . . . .	249
Final check . . . . .	251
<b>Q &amp; A . . . . .</b>	<b>252</b>

## chapter 12 Black-and-White Processing 253

Camera Raw or Photoshop for Black-and-White . . . . .	254
Camera Raw does Black-and-White Right . . . . .	256
How to Think Black-and-White . . . . .	259
Shooting for Black-and-White . . . . .	261
Converting to Grayscale . . . . .	262
Optimum use of Color Sliders . . . . .	266
Using Split Toning . . . . .	267
Q & A . . . . .	270

## chapter 13 Double Processing for Exposure 271

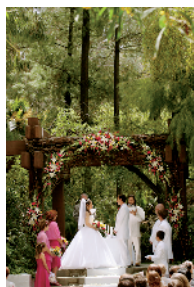

One Size May Not Fit All . . . . .	273
Bright sky, dark ground . . . . .	273
Bringing out the scene . . . . .	274
Processing the Bright Areas . . . . .	275
Processing the Dark Areas . . . . .	280
The Merging Process . . . . .	286
Putting two images into one . . . . .	287
Small area changes . . . . .	292
Process for the Main Photo . . . . .	293
Process for the detail . . . . .	296
Put them together again . . . . .	298

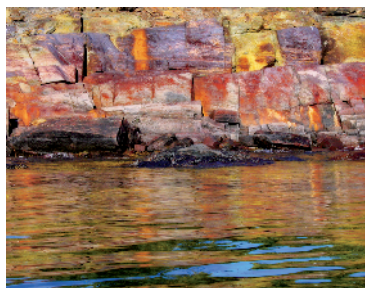

Double Processing for Color and Tonal Range Techniques . . . . .	301
Two-Shot Processing . . . . .	302
Into Camera Raw . . . . .	303
Making the Photo Work . . . . .	310
Q&A. . . . .	316

chapter **14 Post Camera Raw Processing**    **317**

Ansel Adams and Image Processing. . . . .	319
What's a good image, anyway? . . . . .	320
Expressing what you want . . . . .	320
Interpreting an Image . . . . .	322
Sharpening. . . . .	332
Q & A . . . . .	336

appendix **A Alternatives to Camera Raw**    **337**

Why Use Other Programs? . . . . .	338
Adobe Photoshop Lightroom or Apple Aperture versus Camera Raw . .	339
Lightroom . . . . .	339
Aperture. . . . .	339
Camera-Specific RAW Converters . . . . .	340
Canon ZoomBrowser EX and Digital Photo Professional. . . . .	340
Nikon Capture. . . . .	340
Olympus Studio. . . . .	341

Pentax Photo Browser/Laboratory . . . . .	341
Sigma Photo Pro . . . . .	341
Sony RAW Software . . . . .	342
<b>Independent RAW Converters . . . . .</b>	<b>342</b>
DxO RAW Engine. . . . .	342
Phase One Capture One . . . . .	342
Photoshop Elements . . . . .	343
Pixmantec RawShooter. . . . .	343

**Pro Glossary 345**

**Index 351**
